

Report Identification Number: NY-22-019

Prepared by: New York City Regional Office

Issue Date: Aug 29, 2022

This report, prepared pursuant to section 20(5) of the Social Services Law (SSL), concerns:

- A report made to the New York Statewide Central Register of Child Abuse and Maltreatment (SCR) involving the death of a child.
- The death of a child for whom child protective services has an open case.
- The death of a child whose care and custody or custody and guardianship has been transferred to an authorized agency.
- The death of a child for whom the local department of social services has an open preventive service case.

The Office of Children and Family Services (OCFS) is mandated by section 20 of the SSL to investigate or cause for the investigation of the cause and circumstances surrounding the death, review such investigation, and prepare and issue a fatality report in regard to the categories of deaths noted above involving a child, except where a local or regional fatality review team issues a report, as authorized by law.

Such report must include: the cause of death; the identification of child protective or other services provided or actions taken regard to such child and child’s family; any extraordinary or pertinent information concerning the circumstances of the child’s death; whether the child or the child’s family received assistance, care or services from the social services district prior to the child’s death; any action or further investigation undertaken by OCFS or the social services district since the child’s death; and as appropriate, recommendations for local or state administrative or policy changes.

This report contains no information that would identify the deceased child, his or her siblings, the parent, parents, or other persons legally responsible for the child, and any members of the deceased child’s household.

By statute, this report will be forwarded to the social services district, chief county executive officer, chairperson of the local legislative body of the county where the child died and the social services district that had legal custody of the child, if different. Notice of the issuance of this report will be sent to the Speaker of the Assembly and the Temporary President of the Senate of the State of New York.

This report may **only** be disclosed to the public by OCFS pursuant to section 20(5) of the SSL. **It may be released by OCFS only after OCFS has determined that such disclosure is not contrary to the best interests of the deceased child’s siblings or other children in the household.**

OCFS’ review included an examination of actions taken by individual caseworkers and supervisors within the social services district and agencies under contract with the social services district. The observations and recommendations contained in this report reflect OCFS’ assessment and the performance of these agencies.

Case Information

Report Type: Child Deceased
Age: 6 month(s)

Jurisdiction: Queens
Gender: Female

Date of Death: 03/25/2022
Initial Date OCFS Notified: 03/25/2022

Presenting Information

An SCR report was received which alleged that on the morning of 3/25/22, between 3:00AM and 4:00AM, the six-month-old subject child awoke crying. The mother soothed the child, and put her back in her crib. Shortly before 5:00AM, the mother went to check on the child and found her unresponsive. The mother called 911, and the child was transported to the hospital. The child could not be revived and was pronounced deceased.

Executive Summary

This fatality report concerns the death of a six-month-old female subject child that occurred on 3/25/22. A report was registered with the SCR on that same date with allegations of Inadequate Guardianship and DOA/Fatality against the child’s mother. The New York City Administration for Children’s Services (ACS) received the report and investigated the child’s death. An autopsy was performed; however, the completed report was not yet available at the time of this writing.

At the time of the child’s death, she resided with her mother and father. There were no surviving siblings or other children that lived in the household. The investigation found that the subject child was born premature and in February 2022, was diagnosed with a genetic condition called William’s syndrome. Through speaking with specialists and medical providers, ACS learned this condition was due to a missing chromosome, which caused heart defects and narrow blood vessels. The subject child was found to have a ventricular septal defect of the heart and was scheduled to attend her first specialist appointment on the date she died. Interviews revealed that at some time between 3:00AM and 4:00AM on 3/25/22, the subject child woke up crying, and the mother soothed the child before placing her back in her crib to sleep. The father also awoke, as he had to work, and left the home while the mother was tending to the child. The mother awoke again two hours later, at 5:00AM, and found the child unresponsive. She called emergency services, and the child was transported to a local hospital via ambulance, where she was pronounced deceased at 6:24AM.

ACS spoke with family members and collateral sources. Grief and bereavement referrals were provided to the parents, as well as funeral cost assistance. There were no criminal charges brought against the parents regarding the death of the child. Although the final autopsy report was not yet completed, ACS spoke with the medical examiner and medical providers surrounding the fatality, and it was determined that death was not uncommon in children with William’s syndrome. There were no concerns reported regarding the subject child’s safety and well-being prior to her death. The allegations were unsubstantiated, and the investigation was closed.

Findings Related to the CPS Investigation of the Fatality

Safety Assessment:

- **Was sufficient information gathered to make the decision recorded on the:**

- **Safety assessment due at the time of determination?**

N/A

Determination:

- **Was sufficient information gathered to make determination(s) for all allegations as well as any others identified in the course of the investigation?** Yes, sufficient information was gathered to determine all allegations.
- **Was the determination made by the district to unfound or indicate appropriate?** Yes

Explain:
ACS gathered sufficient information to appropriately determine the allegations. There were no surviving siblings or other children in the household.

Was the decision to close the case appropriate? Yes

Was casework activity commensurate with appropriate and relevant statutory or regulatory requirements? Yes

Was there sufficient documentation of supervisory consultation? Yes, the case record has detail of the consultation.

Explain:
The case record reflected supervisory consultations throughout the investigation. The level of casework activity was commensurate with the case circumstances.

Required Actions Related to the Fatality

Are there Required Actions related to the compliance issue(s)? Yes No

Fatality-Related Information and Investigative Activities

Incident Information

Date of Death: 03/25/2022

Time of Death: 06:24 AM

Time of fatal incident, if different than time of death: Unknown

County where fatality incident occurred: Queens

Was 911 or local emergency number called? Yes

Time of Call: Unknown

Did EMS respond to the scene? Yes

At time of incident leading to death, had child used alcohol or drugs? No

Child's activity at time of incident:

- | | | |
|--|----------------------------------|---|
| <input checked="" type="checkbox"/> Sleeping | <input type="checkbox"/> Working | <input type="checkbox"/> Driving / Vehicle occupant |
| <input type="checkbox"/> Playing | <input type="checkbox"/> Eating | <input type="checkbox"/> Unknown |
| <input type="checkbox"/> Other | | |

Did child have supervision at time of incident leading to death? Yes

How long before incident was the child last seen by caretaker? 2 Hours

At time of incident was supervisor impaired? Not impaired.

At time of incident supervisor was:

Distracted
 Asleep

Absent
 Other:

Total number of deaths at incident event:

Children ages 0-18: 1
Adults: 0

Household Composition at time of Fatality

Household	Relationship	Role	Gender	Age
Deceased Child's Household	Deceased Child	Alleged Victim	Female	6 Month(s)
Deceased Child's Household	Father	No Role	Male	39 Year(s)
Deceased Child's Household	Mother	Alleged Perpetrator	Female	33 Year(s)

LDSS Response

On 3/25/22, ACS met with the parents at their residence. The home was observed, appropriate sleeping provisions were seen, and no safety issues were noted. SM reported that SC suffered from colic and typically cried often; however, on 3/21/22, she was crying and could not be consoled. SM stated she and SF were concerned so SM brought SC to see the pediatrician. SM explained that since SC did not have a fever, cough, or runny nose, it was not deemed an emergency and sent them home with a follow-up appointment scheduled for 3/25/22. SM reported that on 3/24/22, SC was again crying and unable to be calmed, so SM got her dressed to take her back to the doctor; however, once SM put SC in the stroller, SC calmed down and was laughing. SM stated she decided then to not take her back to the doctor as she seemed fine. SM reported SC was diagnosed with William’s syndrome 2 weeks prior to her death. SM stated SC was born premature and had a heart murmur. SM and SF explained SC had appointments scheduled with a specialist regarding the genetic condition, the first of which was on the date of SC’s death.

On 3/28/22, ACS spoke with the emergency room doctor who treated SC. The doctor explained that there was no evidence of trauma or bruises on SC’s body, but she did have a ventricular septal defect of her heart. She explained it was not uncommon for patients with Williams’ syndrome to suffer from heart failure or go into cardiac arrest. On 3/29/22, ACS spoke with the geneticist that was scheduled to treat SC’s condition. The geneticist explained that CHN with William’s syndrome have narrow blood vessels, and their deaths tend to look like sudden infant death syndrome. He further stated that he would have followed SC closely after her initial appointment, as some CHN require heart surgery within the first 1 to 2 years of their life, as that is considered a critical period.

Through speaking with LE, ACS learned that sometime between 3:00AM and 4:00AM on 3/25/22, SC woke up crying, and SM soothed her before placing her back in the crib. At that time, SF left for work. LE reported to ACS that shortly before 5:00AM, the mother went to check on SC, found her unresponsive and called 911. A doll re-enactment was completed, and found SM was following safe sleep guidelines, as SC was placed on her back and alone in her crib, with only a fitted sheet.

ACS spoke with medical providers and found there were no concerns regarding the parents’ care of SC, and they had been following all recommendations for additional testing and treatment for the congenital condition. ACS did not find a fair preponderance of evidence that the parents’ actions or inaction led to the death of SC. ACS provided bereavement referrals and funeral cost assistance to the family, and unfounded and closed the case.

Official Manner and Cause of Death

Official Manner: Pending

Primary Cause of Death: Pending

Person Declaring Official Manner and Cause of Death: Medical Examiner

Multidisciplinary Investigation/Review

Was the fatality investigation conducted by a Multidisciplinary Team (MDT)? Yes

Comments: This investigation was conducted by the ACS Multidisciplinary Team.

Was the fatality referred to an OCFS approved Child Fatality Review Team? No

Comments: ACS does not have an OCFS approved Child Fatality Review Team.

SCR Fatality Report Summary

Alleged Victim(s)	Alleged Perpetrator(s)	Allegation(s)	Allegation Outcome
061326 - Deceased Child, Female, 6 Mons	061327 - Mother, Female, 33 Year(s)	DOA / Fatality	Unsubstantiated
061326 - Deceased Child, Female, 6 Mons	061327 - Mother, Female, 33 Year(s)	Inadequate Guardianship	Unsubstantiated

Additional information, if necessary:
 ACS provided the parents with bereavement counseling referrals and funeral cost assistance following the fatality.

Were services provided to siblings or other children in the household to address any immediate needs and support their well-being in response to the fatality? N/A

Explain:

There were no surviving siblings or other children in the household.

Were services provided to parent(s) and other care givers to address any immediate needs related to the fatality? Yes

Explain:

Referrals for grief and bereavement counseling were provided to the parents.

History Prior to the Fatality

Child Information

- Did the child have a history of alleged child abuse/maltreatment? No
- Was the child ever placed outside of the home prior to the death? No
- Were there any siblings ever placed outside of the home prior to this child's death? N/A
- Was the child acutely ill during the two weeks before death? No

Infants Under One Year Old

During pregnancy, mother:

- Had medical complications / infections
- Misused over-the-counter or prescription drugs
- Experienced domestic violence
- Was not noted in the case record to have any of the issues listed
- Had heavy alcohol use
- Smoked tobacco
- Used illicit drugs

Infant was born:

- Drug exposed
- With neither of the issues listed noted in case record
- With fetal alcohol effects or syndrome

CPS - Investigative History Three Years Prior to the Fatality

There is no CPS investigative history in NYS within three years prior to the fatality.

CPS - Investigative History More Than Three Years Prior to the Fatality

There was no CPS investigative history more than three years prior to the fatality.

Known CPS History Outside of NYS

There was no known CPS history outside of NYS.

Legal History Within Three Years Prior to the Fatality

Was there any legal activity within three years prior to the fatality investigation? There was no legal activity.

Recommended Action(s)

Are there any recommended actions for local or state administrative or policy changes? Yes No

Are there any recommended prevention activities resulting from the review? Yes No
